

Great White™

Lomandra longifolia 'MURU' ♂ intended

STRAPPY LEAF PLANTS

A variegated form of *Lomandra* with bigger flowers and a more dense, compact form.

- A clean growing, uniform, non-seeding *Lomandra*.
- This plant is similar to 'Katrinus Deluxe' *Lomandra*, but with a variegated twist.
- Looks amazing planted en masse. Also looks good in specimen plantings and commercial plantings such as roadsides, golf courses, factories and offices.
- Lives on natural rainfall in most populated areas in Australia. Occasional top up watering will be required in extreme drought.
- Tolerates windy and salt laden windy positions, but avoid foredune situations too close to the beach.
